

## **PRESS RELEASE**

### **‘Machinery CE Expert’ qualification**

#### **Become an expert in machine safety in just four days**

**Wuppertal / Nuremberg, 8 November 2022.** The tec.nicum academy – part of the Schmersal Group’s service division – has recently added a new qualification programme to its training options: participants can now train to become a ‘Machinery CE Expert’ (MCEExpert) during a four-day seminar.

Schmersal has developed the seminar and its content on the basis of many years of relevant experience; the seminar has been certified by TÜV Rheinland. The compact course is designed to deliver all knowledge needed to carry out a CE conformity assessment procedure for machinery and plants, with all relevant sub-steps. With its compact nature and extensive conveyance of knowledge, the seminar is unique to the market.

Upon successful completion, participants will be able to demonstrate their qualification in machine safety using a certificate issued by TÜV Rheinland. They will also have the right to use the title ‘Machinery CE Expert with TÜV Rheinland Certified Qualification’. The qualification has international recognition.

TÜV Rheinland’s online certificate database ‘Certipedia’ provides information on all tested product features, services, companies, systems and personal certifications ([www.certipedia.com](http://www.certipedia.com)). The description of the ‘Machinery CE Expert’ seminar and the individual identification number of every graduate from the programme can be seen and verified in ‘Certipedia’.

The cost to take part is €2900, which includes the fees charged by TÜV Rheinland for the final exam.
